SKILLS

- HTML5
- CSS3
- Javascript
- jQuery
- Typescript
- UI, Figma
- Angular – 14, 18
- NGRX
- React TSX
- Python, Django (Beginner)
- MYSQL
- Java spring boot (Beginner)

EDUCATION

- **Bachelor Degree - (2008 - 2012)**
Odaiyappa College of Engg Theni
B.E - Computer Science - 7.0 CGPA
- **HSC - (2007 - 2008)**
Mangayarkarasi higher sec school
TN HSC - 75%
- **SSLC - (2005 - 2006)**
Mangayarkarasi higher sec school
TN SSLC - 85%

CERTIFICATION

- Microsoft certified: Front-End Web Development
- Udemy certified: React and Django

Lead Frontend Developer with 10+ years of experience delivering high-performance web applications using Angular, JavaScript, and modern UI frameworks. Proven track record in building scalable UI architectures, leading development teams, and collaborating cross-functionally to drive business impact

EXPERIENCE

- **Comcast India Engineering Center I LLP**, Chennai (December-15-2021 to till present)
- **Apptium Technologies**, Chennai for 1.10 years (January-20-2020 to November-30-2021)
- **RheinBrücke IT Consulting Pvt Ltd**, Chennai for 10 months (Mar-06-2019 to Jan-17-2020)
- **ApexSoft Solutions**, Madurai for 1.10 years (June-12-2017 to March-04-2019)
- **WilliamsLea Tag**, Chennai for 1.6 years. (Jan-18-2016 to June-09-2017)
- **Niyati Technologies**, Chennai for 1.2 years.(Nov-12-2014 to Jan-15-2016)

NPM PACKAGE

WEB APP TOUR :

I've developed an npm package plugin for seamless application tours, compatible with both Angular and React frameworks.

Angular: <https://www.npmjs.com/package/angular-app-tour>

React TSX: <https://www.npmjs.com/package/web-app-tour>

ANGULAR CAROUSEL FADE SLIDER:

I've developed an npm package plugin for carousel fade animated slider, compatible with Angular frameworks.

Angular: <https://www.npmjs.com/package/angular-carousel-fade-slider>

PROJECTS

ENTERPRISE ACCESS CENTER - Lead UI Developer I Comcast

Tech Stack: Angular 14, Java Springboot

- The EAC application is a router-based telecommunication platform that enables users to monitor router status, request connections, and restart routers directly through the application.
- In this project, we implemented lazy loading and upgraded the application from Angular 8 to Angular 14.
- Additionally, we introduced a custom style directive to eliminate the need for inline CSS and prevent class name duplication, resulting in cleaner and more maintainable code.
- I also participated in our company's LabWeek, where I worked on enabling push notifications similar to those on Facebook and Twitter. For my contributions, I was honored with the Champ Award.

BEDROCK - Lead UI Developer | Comcast

Tech Stack: Angular 12, Java Springboot

- Bedrock is a multi-tenant application comprising more than six micro frontend applications, all seamlessly integrated into a single shell parent application.
- As the Lead Frontend Developer, I developed reusable components for tables and filter displays, along with a shared SCSS file similar to Bootstrap's CSS framework.
- These reusable components and the common CSS have greatly improved the application's overall quality, consistency, and maintainability.

TUNE PROTECT - Senior UI Developer | Apptium Technologies

Tech Stack: Angular 8, Java Springboot

- Developed and maintained an Insurance Products Application using Angular 8 with material.
- Implemented features like policy comparison, real-time quotes, and claims processing to enhance user experience.
- Integrated RESTful APIs for fetching insurance products and managing user policies
- Optimized UI/UX for seamless navigation and accessibility across devices.
- Worked closely with backend teams to ensure secure transactions and data handling.

ECONET - Senior UI Developer | Apptium Technologies

Tech Stack: Angular 8, Java Springboot

- Developed and maintained a Telecom Products Application using Angular 14 with NgRx for state management.
- Implemented features like plan comparison, real-time activation, and usage tracking to enhance user engagement.
- Integrated RESTful APIs for fetching telecom plans, managing subscriptions, and handling billing.
- Optimized UI/UX for smooth navigation and cross-device compatibility.
- Collaborated with backend teams to ensure secure transactions and seamless service activation.

KATALYST MOBILE APPLICATION - Senior Frontend Developer | RheinBrücke

Tech Stack: Angular 8, Dotnet Web API, jQuery

- Developed an Angular API service to fetch data from the backend and seamlessly integrate it into the frontend using Angular components.
- Utilized Local Storage and Cookie Services for data persistence and leveraged Bootstrap for a responsive and visually appealing design.

ETL – BOTTLE WEIGHING - Senior Frontend Developer | RheinBrücke

Tech Stack: Angular 8, Dotnet Web API, jQuery

- Developed an intuitive Easy Layer Touch application for weighing, built with AngularJS and integrated with technologies such as Cordova, Angular State Provider Routing, Bluetooth Plugin, Ethernet Plugin, and WiFi Plugin.

- Designed and implemented AngularJS AJAX call services to fetch data from the backend and seamlessly integrate it into the frontend using Angular components. Enhanced the user interface with Bootstrap, ensuring a responsive and visually appealing design.
- **I have completed 50+ projects using HTML5, CSS3, jQuery, JavaScript and WordPress**

ACHIEVEMENTS

- Created Reusable component like plugin for Accessibility.
- Improved our application performance using Lazy loading concept in EAC Application.
- Upgraded Angular version from 8 to 14.
- Implemented Newsletter Drag and Drop project like MailChimp and Wix using Angular 8.
- Created Charts like Bar Charts, Line Chart, Donut Charts, Pie Charts, Combined Line Chart with download and export options such as JPG, PNG, SVG and PDF.
- Developed more than 40 emailers with responsive and 30 JavaScript manual code banners.
